

Yugandhar Reddy Bana

Full Stack Software Developer

T: +353894851413 | E: yugandharreddybana@outlook.com | Dublin 9, Ireland | Stamp 1G – Full Working Rights

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience delivering scalable web applications across React.js, Vue.js, Node.js, TypeScript, and Java Spring Boot. Improved Verizon enterprise dashboard response times by 67% through performance profiling and led a migration from a monolithic platform to microservices architecture across production systems. Currently shipping AI-augmented full-stack products to production. Stamp 1G holder based in Dublin. Available immediately.

SKILLS

Frontend: React.js, Vue.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive UI/UX, Figma

Backend: Java, Spring Boot, Node.js, REST API, Microservices Architecture, OOP, SOLID Principles

Databases: PostgreSQL, SQL Server, MySQL

Cloud & DevOps: Docker, Jenkins, GitHub Actions, CI/CD, Git, AWS

Testing: Test-Driven Development (TDD), JUnit, Jest, SonarQube, Postman

Practices: Agile, Scrum, JIRA, Software Development Life Cycle (SDLC), Performance Optimisation, Scalable Applications

AI Development & LLM: GitHub Copilot, Cursor, Claude, Google Gemini API, Prompt Engineering

PROFESSIONAL EXPERIENCE

Full Stack Software Developer

Sept 2024 - Present

Independent Developer (Self-Directed) | Dublin, Ireland

- Self-initiated and shipped 3 full-stack AI-drive products to production, owning architecture, delivery, and deployment end-to-end without external oversight.
- Spearheaded system design applying microservices principles, REST API boundaries, a unified codebase structure, and strict TypeScript typing across 3 distinct applications.
- Integrated AI workflows into 4+ production features including voice input, document parsing, and contextual recommendations, demonstrating applied AI engineering beyond prompt-level usage.
- Implemented a 3-tier role-based access control model with nested permission hierarchies and Stripe subscription billing, delivering enterprise-grade authorisation and payment patterns solo.

Full Stack Software Developer

Apr 2024 - Sept 2024

Freelance Developer | Dublin, Ireland

- Delivered full-stack features across React.js, Node.js, and Java stacks, achieving 40% faster delivery cycles through AI development workflows (GitHub Copilot, Cursor, Claude) embedded into SDLC practice.
- Created responsive, component-driven UI systems in Figma and translated designs into production-ready React.js interfaces with reusable design tokens.
- Authored automated test suites across UI, API, and backend layers, reaching 95%+ code coverage.

Software Engineer

Aug 2021 - Jan 2024

Incedo Technologies Solution Ltd (Client: Verizon) | Hyderabad, India (Full Time)

- Diagnosed rendering bottlenecks in Verizon's React.js and Redux customer search dashboard through performance profiling, then optimised the render path to deliver a 67% speed improvement across high-volume user journeys.
- Led the migration of a legacy monolithic platform to a Java Spring Boot microservices architecture, improving fault tolerance and reducing new developer onboarding time by 35%.
- Analysed high-risk manual data entry workflows to isolate failure points, then developed a real-time CSV processing pipeline in Node.js and Java that reduced operational data errors by 70%.
- Initiated and drove the integration of JUnit continuous testing and quality gates into Jenkins CI/CD pipelines, reducing production defects by 70% and deployment rollbacks by 20%.
- Coordinated cross-functional Agile incident response across enterprise telecom workloads, resolving 90% of live production issues in real-time, recognised with the Made a Difference Award 3 consecutive times for performance optimisation and team collaboration.

PROJECTS

Personal Finance Tracker with AI | [Link](#)

Tech Stack: TypeScript, Node.js, Java, Spring Boot, Google Gemini API, MCP Servers

- Launched and deployed a multi-currency AI-augmented expense platform with 4+ input modes (manual entry, receipt photo parsing, bank statement ingestion, voice-based capture), owning schema, authentication, API, frontend, and containerisation end-to-end.
- Analysed multi-source transaction data to power an AI-driven insights engine covering 5+ financial dimensions (budgets, recurring payments, loans, savings goals, and net worth forecasting).

Cortex AI-Powered Knowledge Management Platform | [Link](#)

Tech Stack: React.js, TypeScript, Node.js, PostgreSQL, Docker, Google Gemini API

- Created a full-stack knowledge management application enabling users to capture, organise, and share highlights from websites and AI chat interfaces, with AI-generated contextual insights on each saved item.
- Modelled a nested folder structure with 3-tier role-based sharing (Viewer, Editor, Commenter) and a BFF proxy pattern, enforcing granular permission logic across a multi-tenant data model with WebSocket-driven real-time updates.

AI-Powered Task Management Application | [Link](#)

Tech Stack: React.js, Vue.js, Node.js, TypeScript, Java, Google Gemini API

- Produced a Notion-style task management system with 3 input modes (keyboard, voice, AI-generated) and embedded AI chat for contextual productivity suggestions.
- Implemented a job-tracking module that recommends relevant roles based on user profile signals, demonstrating applied LLM integration beyond basic prompt-response workflows.

EDUCATION

MSc in Data Analytics National College of Ireland, Dublin (Grade: 2:1)	Jan 2024 - Jan 2025
BSc in Computer Science & Engineering SASTRA University, India (Grade: 7.5/10)	Jul 2017 - Aug 2021

CERTIFICATIONS

Meta Frontend Developer - Meta
AWS Certified Cloud Practitioner - Amazon Web Services
IBM Java Developer Professional Certificate - IBM
Google Prompting Essentials Specialisation - Google
